California Steamers,
Carrying the United States Mail

Through Turkey, including transit of the Indian
on Passage No. 11.

5th and 20th of each Month.

 In order of the Postmaster General, the United States Mail Steamers will hereafter be dispatched from New York direct to Argentina, on the 5th and 20th of each month, excepting when the dates occur Sunday, at which time the sailing will be postponed to the following Monday.

The arrangements have now been completed so that the United States Mail Steamers will be

Passage for San Antonio is principally by rail, on arrival at the Atlantic and Gulf coast, this occurs through the passenger line by the Gulf Line, a route of short passage, without any detention on the isthmus.

Passengers are landed at the Railroad Depot, Aspinwall, *near the wharf*. The Railroad being empty, and Cars running through to Panama, it is necessary only to be required for crossing the Isthmus.

Tickets must be secured by one of the Companies Agents, before they will be received, by the Agents at Panama, and Tickets thus secured can be taken at the *only authorized agent* for the Fast Mail Steamship Company in this city.

C. L. BARKLEY, Agent,
No. 10 Broad Street
Boston, Feb. 15, 1855.

1. The first step is to identify the key components of the system. This includes the hardware, software, and data.

2. The second step is to analyze the system's performance. This involves measuring the system's response time, throughput, and other key metrics.

3. The third step is to identify the bottlenecks in the system. These are the areas where the system's performance is most degraded.

4. The fourth step is to implement the necessary changes to improve the system's performance. This may involve upgrading hardware, optimizing software, or restructuring data.

5. The fifth step is to monitor the system's performance after the changes have been implemented. This ensures that the system is performing as expected and that the changes have been effective.

The first of these is the fact that the
 second of these is the fact that the
 third of these is the fact that the
 fourth of these is the fact that the
 fifth of these is the fact that the
 sixth of these is the fact that the
 seventh of these is the fact that the
 eighth of these is the fact that the
 ninth of these is the fact that the
 tenth of these is the fact that the
